SUBJECT: Visits of Inspection to SSU Stations

1. The Problem:

a. By memorandum of 13 May to the Director of Central Intelligence, the Acting Chief of Operational Services recommended a program of inspections to SSU stations in Europe and the Far East. Enclosed in his memorandum was a bound report of the operational and administrative control of the missions and stations maintained by SSU in those regions.

b. The Director of Central Intelligence had the above papers forwarded to the Planning Staff, under a Secretary, NIA, disposition form of 14 May, calling on the Planning Staff for comment as to the exact scope of the inspections to be made. Details are as follows:

 - (a) An early survey of the principal components of SSU in order to appreciate better what should be the nature of the organization during the period of transition.
 - (b) A study of the local problem in order to determine what contacts and what liaisons might be maintained advantageously in the future.
- (2) The disposition form of 14 May states that Colonel Fortier's analysis of the exact scope of each inspection will be transmitted to the Planning Staff when received by the Secretary, NIA.
- (3) The only Planning Staff copies of the documents referred to above are enclosed under the original hereof for use of the Information Branch in preparing the necessary study. When Colonel Fortier's analysis is received, it also will be referred to the Information Branch.
